Department of Economics and Financial Systems

“

About the Department:

The Department of Economics and Financial Systems was established within the College of Business at Imam Bukhary University in 2025, in response to the growing need to prepare qualified personnel in the fields of economics and financial systems, thereby contributing to supporting the pathways of economic and social development in the Republic of Gambia and the West Africa region.

The program commenced at the beginning of the academic year 2025–2026, aiming to prepare business leaders and professional competencies capable of competing in the labor market at local, regional, and international levels.

Through this department, the college is keen to provide a stimulating educational environment that fosters creativity and innovation, and to encourage applied scientific research related to economic and societal issues, thereby contributing to the provision of practical solutions to current challenges. It also aims to prepare graduates who possess leadership skills, strong professional values, and a high capacity to adapt to the rapidly changing economic conditions in the global work environment.

Department Vision:

The department aims to be a leading and distinguished entity in the teaching and research of economics and financial systems, serving as a source for preparing leadership competencies that contribute to sustainable economic development at both the local and regional levels.

Department Mission:

To prepare graduates who are scientifically and professionally qualified in the fields of economics and financial systems, through the provision of modern academic programs and applied scientific research, enabling them to understand and analyze economic phenomena, develop innovative financial solutions, and contribute effectively to serving the community and meeting the needs of the labor market.

Program Objectives:

The long-term aims of the program are represented in achieving the following objectives:

- **Competency Development:** Preparing highly qualified specialists in the fields of economics and financial systems, capable of meeting the evolving demands of the labor market.
- **Support for Scientific Research:** Encouraging applied scientific research that contributes to the analysis of economic and financial issues and provides innovative solutions.
- **Community Service:** Providing economic and financial expertise and consultations to institutions and individuals, and contributing to community development.
- **Academic Leadership:** Striving for excellence in delivering advanced educational programs that align with global academic standards.

Program Objectives:

- 1. Providing Distinguished Education:** Delivering high-quality academic education in the fields of Economics and Financial Systems, integrating theoretical knowledge with practical application.
- 2. Development of Analytical Skills:** Building students' analytical and critical capacities in understanding economic and financial phenomena, and equipping them with scientific research tools.
- 3. Linking Theory to Practice:** Connecting theoretical knowledge in the fields of economics and financial systems with their practical applications in the labor market and financial institutions.
- 4. Instilling Professional Values:** Enhancing ethical and professional values, such as integrity, transparency, and social responsibility, in the practices of students and graduates.
- 5. Community Service:** Utilizing the capabilities of faculty members and students in providing economic and financial consultations and solutions to the community.
- 6. Academic Accreditation:** Offering a Bachelor's program that complies with national and international academic accreditation requirements.
- 7. Integrated Personality Development:** Preparing graduates who possess a balanced personality, capable of strategic thinking and decision-making in the business environment.
- 8. Researcher Preparation:** Qualifying a generation of researchers in economics and financial systems who possess critical thinking skills and the fundamentals of scientific research, enabling them to pursue their postgraduate studies.
- 9. Communication Skills Development:** Enhancing students' reading, writing, and effective communication skills in business and economic contexts.
- 10. Meeting Labor Market Needs:** Fulfilling the community and private sector's demand for specialized competencies in the fields of economics and financial systems.

Program Overview and General Information:

- 1- Program Name:** Bachelor's Degree Program in Economics and Financial Systems.
- 2- Total number of credit hours required to complete the program:** (127) credit hours of coursework.
- 3- Degree Awarded Upon Completion of the Program:** Bachelor's Degree in Economics and Financial Systems, from the College of Business at Imam Bukhary University.
- 4- Professions or positions for which students are qualified upon graduation:**

The program graduate is qualified to work in a number of economic, financial, and consultancy fields, most notably:

1. Working as a teaching assistant in academic institutions and universities (in accordance with the governing regulations).

2. Employment in the banking and financial sector (whether in banking operations, financial supervision, or financial product development).
3. Economic Researcher or Financial Analyst in research centers, ministries, and governmental agencies.
4. Working in monetary institutions, financial markets (stock exchanges), and financial regulatory authorities.
5. Financial and tax consulting in companies and major consulting firms.
6. Portfolio Management and Risk Analysis in Investment and Insurance Companies.
7. Working in the field of Islamic economics and participatory banking, auditing financial transactions, and ensuring their compliance with regulations.

Important Note: When elective courses are offered at any academic level, the student must select one of the two courses presented to fulfill the graduation requirements.

Learning Outcomes for the Department of Economics and Financial Systems:

A graduate of the Department of Economics and Financial Systems at the College of Business, Imam Bukhary University, is expected to be capable of:

a. Knowledge and Understanding

a₁- Familiarity with the fundamental concepts and major theories in microeconomics and macroeconomics.

a₂- Knowledge of the principles of financial systems, financial markets, and banking institutions.

a₃- Comprehension of economic and financial analysis tools and their applications in various business environments.

a₄- Understanding contemporary economic and financial issues, as well as the challenges facing local, regional, and international economies.

b. Cognitive (Intellectual) Skills:

b₁- Analyze complex economic and financial issues according to a scientific and logical approach.

b₂- Comparison between different economic and financial theories and schools and their evaluation.

b₃- Critique of economic and financial policies, and proposing innovative solutions to existing challenges.

b₄- Utilizing economic and financial data and information in reasoning and decision-making.

C. Professional and Practical Skills:

C₁- Preparation of specialized economic and financial studies and research.

C₂- Application of statistical and economic tools and software in data analysis.

C₃- Utilizing traditional and digital economic and financial information sources in research and analysis.

C₄- Employ economic and financial knowledge in addressing contemporary societal and developmental issues.

d. General Skills (Transferable):

d₁- Communication and effective interaction skills, writing economic and financial reports, and delivering presentations.

d₂- Working effectively within a team, assuming responsibility, and managing time and resources.

d₃- Utilization of modern technologies and specialized software in the fields of economics and finance.

d₄- Commitment to ethical and professional values in the practice of economic and financial work, and social responsibility.

Administrative Staff							
Other							

Criteria for the Selection of Academic Staff:

- 1. Academic Authenticity:** Obtaining academic degrees from recognized universities with a prestigious academic reputation in Islamic sciences.
- 2. Research Output:** Possession of an outstanding research record and publications in peer-reviewed scientific journals, especially for applicants for the ranks of Professor and Associate Professor.
- 3. Teaching Experience:** Possession of prior experience in university-level teaching and the ability to utilize modern educational technologies.
- 4. Moderation and Balance:** Commitment to the methodology of Ahl al-Sunnah wa al-Jama'ah, and the ability to instill the values of tolerance and moderation in students.

Learning Resources for the Economics and Financial Systems Program

To achieve the maximum educational and research benefit for students of the Economics and Financial Systems program, the program at Imam Bukhary University relies on an integrated and diverse system of learning resources. These resources aim to equip students with specialized economic and financial knowledge, develop quantitative analysis and decision-making skills, and align with the requirements of the local, regional, and international labor markets. These resources are distributed as follows:

1. Printed Books and References:

Available Books in the Central Library of Imam Bukhary University: The collection includes a wide range of fundamental and advanced references in the fields of macroeconomics and microeconomics, econometrics, financial systems, financial markets, investment management, and Islamic finance, in addition to recent books on economic policies, financial analysis, and applied studies.

Specialized Libraries: Utilizing faculty members' libraries, specialized public libraries in economics and finance, and the modern scientific resources and economic reports they provide.

2. Electronic Resources and Databases:

Electronic resources available in the databases of the digital library at Imam Bukhary University: provide access to thousands of e-books, peer-reviewed scientific journals, and global economic reports through the university's subscriptions to specialized databases in economics and finance.

Peer-Reviewed Scientific Journals: Reviewing the latest research in the fields of economics and financial systems through international scientific journals and academic databases, thereby enhancing the ability to keep up with scientific developments.

3. Interactive and Educational Resources:

- **Lecture Notes and Visual Presentations:** Educational materials (PowerPoint) provided by faculty members, including explanations of economic concepts, analytical models, case studies, and applied questions.

- **Recorded Lectures:** Educational recordings that enable students to review topics such as Economic Analysis, Econometric Modeling, and Financial Markets at any time.

- **Discussion Forums:** Interactive platforms for discussing contemporary economic issues, analyzing fiscal policies, and exchanging scholarly opinions under academic supervision.

4. Specialized Websites:

- **Reliable academic websites:** Websites of international economic institutions, central banks, and monetary funds that provide up-to-date data, statistics, and analytical reports.

- **Personal websites of scholars and researchers:** Utilizing the scientific content provided by experts and researchers in the fields of economics and finance through their digital platforms.

- **Academic Research Gateways:** For accessing scientific research, university theses, and applied studies in economics and financial systems.

5. Internally Produced Educational Materials:

- **Authored and Translated Textbooks:** Books and publications produced by the faculty members of the department, whether original authorship or translation of important references, which reflect the academic and research expertise of the department and directly meet the students' academic needs.

- **Applied Studies and Exercises:** Training materials aimed at developing skills in economic analysis, the use of statistical software, market study, and making data-driven financial decisions.

This integrated system of learning resources contributes to building a solid scientific foundation for students of Economics and Financial Systems, enabling them to acquire skills in quantitative and qualitative analysis, strategic thinking, and sound economic decision-making, thereby qualifying them to work efficiently in various economic and financial sectors.

Admission and Student Support

The Department of Economics and Financial Systems places great emphasis on the student's academic and personal journey from the moment of application to enrollment in the program until graduation. The admission and student support system aims to attract promising talents and provide a stimulating and inclusive educational environment that ensures students' success and excellence through a comprehensive set of requirements, programs, and services.

First: Admission Requirements for Students in the Department of Economics and Financial Systems

To ensure the recruitment of qualified students capable of comprehending the study requirements in the Department of Aqidah and Usul al-Din, the department establishes a set of admission conditions and criteria, as follows:

- 1. Legal Age:** The applicant must be at least 18 years old at the commencement of studies.
- 2. Admission Tests:** Passing the written and oral admission examination conducted by the department, which aims to assess the student's comprehension of fundamental Sharia concepts as well as their linguistic, numerical, and scientific abilities.
- 3. Academic Qualification:** Obtaining a General Secondary Education Certificate or its equivalent, accompanied by the submission of a transcript demonstrating that the student has achieved at least a good grade in the following core subjects:
 - The Holy Quran.
 - English Language.
 - Mathematics.
- 4. Criminal Record:** Submission of a certificate of no criminal record from the competent authorities to ensure the student's adherence to ethical and societal values.
- 5. Health Fitness:** Obtaining a medical certificate proving the student's health fitness for university study.
- 6. Personal Documents:** Submit two recent passport-sized photographs, along with the birth certificate, and the passport or national identity card.
- 7. Commitment Pledge:** Signing a written pledge to adhere to the standards, rules, and general values promoted by Imam Bukhari University both within and outside the campus, reflecting discipline and mutual respect.
- 8. Registration Fees:** Payment of the prescribed registration fees at Ecobank, and submission of the payment receipt to Imam Bukhari University for verification of the completion of the process.

Secondly: Orientation and Preparation Programs for New Students:

The department is keen to provide a welcoming and supportive environment for new students through comprehensive orientation and preparation programs held at the beginning of each semester, which include:

- 1. Reception Ceremony:** Organizing a reception ceremony for new students, aimed at introducing them to Imam Bukhary University and the department, and facilitating their integration into university life.
- 2. Introduction to Regulations and Policies:** Providing detailed introductory sessions on the academic and administrative regulations and policies of the university and the department, the courses, classrooms, the central library, and all available facilities and services.

Third: Counseling Services (Academic, Career, Psychological, Social):

The department offers a comprehensive range of counseling services to support students in various aspects of their academic and personal lives, as follows:

- 1. Guidance Handbook:** Providing each student with a comprehensive guidance handbook that covers student activities, regulations and policies, and available services, to serve as a reference for the student throughout their period of study.
- 2. Academic Supervisor:** The appointment of a faculty member as an academic supervisor for a specific number of students from the beginning of the program until graduation. The academic supervisor provides support and guidance to the student regarding the study plan, course selection, minor specializations, and academic challenges.
- 3. Specialized Guidance:** Providing advice and assistance to the student regarding the field of specialization, and directing them towards available research and professional opportunities in Aqeedah and Usul al-Din.
- 4. Personal and Social Guidance:** Receiving students and providing guidance during designated office hours to offer support and advice on personal and social aspects that may affect their academic progress, while maintaining complete confidentiality.

Fourth: Special Support:

The department is committed to providing special support for students with diverse needs to ensure they have equal opportunities for success and excellence.

- 1. Support for Academically Struggling Students:** Students experiencing academic difficulties are guided to fulfill the necessary requirements and needs by participating in intensive training courses and workshops aimed at achieving the required levels and skills. Examples of this include the e-learning course conducted at the beginning of each semester within the program, in addition to individual or group tutoring sessions.
- 2. Support for Persons with Disabilities:** Special facilities are provided for individuals with physical disabilities, including designated parking spaces, equipped restrooms, and accessible pathways, to

ensure an inclusive and accommodating university environment.

3. Gifted and Talented Student Support: The department offers specialized programs to support gifted and talented students, including opportunities to participate in scientific research, conferences, academic competitions, and the provision of scholarships or incentive awards, aimed at developing their abilities and guiding them towards excellence and creativity.

Program Quality Assurance

The Department of Economics and Financial Systems is committed to applying the highest standards of academic and administrative quality to ensure the excellence of its educational and research outcomes. This is achieved through an integrated quality assurance system encompassing all aspects of the program. The system aims at the continuous improvement of performance, meeting the requirements of academic accreditation, and fulfilling the mission and strategic objectives of Imam Bukhary University.

1. Quality Assurance System in the Program:

The program adopts an internal quality assurance system that aligns with national and international standards for higher education. This system includes clear mechanisms for quality planning, implementation, monitoring, evaluation, and continuous improvement. This is achieved through:

- **Defining Quality Standards:** Establishing clear standards for the quality of teaching, curricula, scientific research, student services, and facilities.
- **Periodic Review:** Conducting periodic reviews of all program components by specialized internal and external committees.
- **Feedback:** Collecting and analyzing feedback from students, faculty members, graduates, and employers for use in improvement processes.
- **Improvement Plans:** Developing detailed action plans to address identified weaknesses and enhance strengths through evaluation processes.

2. Quality Control Procedures for Program Courses Taught by Other Academic Departments

To ensure consistency and quality in the courses taught by other departments (such as Arabic language courses, or certain linguistic, Sharia, or educational courses of relevance), the following procedures are implemented in coordination with the heads of the respective departments:

- **Systematic Coordination:** Conduct periodic meetings with department heads and relevant faculty members to review course descriptions, content, teaching methods, and assessment approaches, ensuring their alignment with the objectives of the Economics and Financial Systems program.
- **Report Exchange:** Exchange of academic performance reports of students in these courses, as well as course evaluation reports by students and faculty members.

- **Joint Review:** Conducting joint reviews of the achieved learning outcomes in these courses and providing recommendations for their improvement when necessary.

3. Procedures Followed to Ensure Equivalence Between the Program Headquarters and Other Branches (If Any)

In the event that there are other branches of the program or parallel tracks (such as a track designated for male students and a track designated for female students within a single main campus), the department ensures equivalence in the quality of education and available resources. Since the current program focuses on a single main campus, this point does not directly apply to the existence of independent branches. However, equivalence between male and female students at the main campus is ensured through:

- **Curriculum Unification:** The application of the same study plans and educational curricula for all male and female students.
- **Equal Resources:** Providing the same educational materials, facilities, and services to all students without discrimination.
- **Assessment Criteria:** Application of unified and fair assessment standards for all students.

4. Strengths that can be highlighted:

The Bachelor of Economics and Financial Systems program at the Faculty of Business at Imam Bukhary University represents a comprehensive academic framework that integrates Islamic jurisprudence with modern economic and financial sciences. This unique program demonstrates several key strengths that establish it as a pioneering educational initiative in Islamic economics and finance.

أ- The integration of the contemporary scientific approach with the applications of Islamic jurisprudence:

The program successfully integrates the principles of Islamic Jurisprudence (Sharia) with contemporary economic, administrative, and technological sciences in a precise balance. This integration ensures that graduates possess a profound knowledge of Islamic legal principles and their practical applications in modern economic contexts.

ب- Focus on Practical Applications:

The curriculum places significant emphasis on practical applications, encompassing units in Islamic Finance, Governance and Transparency, Risk Management, and Financial Technology. This practical orientation ensures a direct connection between students and the labor market.

ت- Contemporary Technological Integration:

The program includes advanced courses in Information Systems, Artificial Intelligence, and Financial Technology to ensure that the curriculum remains aligned with the developments in Islamic banking and the digital economy.

ث- A Strong Jurisprudential Foundation:

The program demonstrates a clear jurisprudential depth through courses such as Financial Sharia Policy and Objectives of Sharia in Transactions. This curriculum provides students with the ability to address contemporary financial issues from a well-established and clear Islamic legal perspective.

ج- Focus on Professional Development:

The program aims to professionally qualify students through practical training and graduation projects, providing them with genuine practical experience that enhances their employment opportunities after graduation.

ح- Progressive Academic Structure:

The program is distributed over eight levels, taking into account academic progression and diversity, beginning with fundamental introductions and advancing to specialized advanced topics.

خ- Interactive Design with the Market:

The curriculum reflects the needs of the Islamic financial market in the region and addresses the required competency gaps in banks and financial companies.

5. Program Plan for Measuring Learning Outcomes at the Program Level:

The program adopts an approved plan for assessing learning outcomes at the course level and subsequently at the overall program level. This plan aims to ensure that students acquire the knowledge, skills, and competencies specified in the program objectives. Learning outcomes are measured through:

- **Various Assessment Tools:** Utilizing diverse assessment tools such as tests, research projects, presentations, case studies, and practical evaluations.
- **Results Analysis:** The outcomes of learning outcomes assessment are analyzed periodically, and the reports are discussed in the Department Council of Economics and Financial Systems.
- **Improvement Decisions:** Based on the results of the analysis and discussions, necessary decisions are made to enhance the quality of the courses, develop teaching methods, and optimally utilize the expertise of the faculty members.

6. Program Quality Assessment:

The quality of the program is continuously evaluated through a set of domains, sources, methods, and specified timings, as outlined in the following Key Performance Indicators (KPIs) table:

Performance Indicators for the Bachelor's Program in Economics and Financial Systems

m	Code	Performance Indicator	Target Audience	Measurement Methods	Measurement Timing
---	------	-----------------------	-----------------	---------------------	--------------------

1	KPI-01	Achievement Rate of the Program's Operational Plan Objectives	75%	Committee Reports	End of the Academic Year
2	KPI-02	Student Satisfaction with the Quality of Economics and Financial Systems Courses	85%	Questionnaires	End of the semester
3	KPI-03	Student Satisfaction with the Competence of Faculty Members in the Major	85%	Questionnaires	End of the semester
4	KPI-04	Program Learning Outcomes (PLOs) Achievement Rate	75%	Measurement Reports	End of the semester
5	KPI-05	Course Learning Outcomes (CLOs) Achievement Rate	80%	Course Reports	End of the semester
6	KPI-06	Graduation Rate in the Program	60%	Academic Records	End of Year
7	KPI-08	Pass Rate in Economics and Financial Systems Courses	85%	Academic Records	End of the semester
8	KPI-09	Graduate Employment Rate in Their Fields of Specialization	40%	Graduate Surveys	Six months after graduation
9	KPI-10	Graduate Enrollment Rate in Postgraduate Studies (Master's (followed by Doctorate	%20	Graduate Surveys	Six months after graduation
10	KPI-11	Graduate Satisfaction with the Program	80%	Questionnaires	Annually
11	KPI-13	Average Scientific Production of Faculty Members in the Specialty	1 ≤ Research/Member	Research Reports	Annually
12	KPI-14	The percentage of utilization of economic and financial databases and digital technologies in research	70%	Course Reports	End of semester
13	KPI-16	Number of participations in scientific conferences on economics and finance	2 ≤ annually	Department Reports	Annually
14	KPI-18	Number of workshops and courses in Economic and Financial Research Skills	3 ≤ annually	Training Reports	Annually
